VAL D'ISÈRE VILGRAIN

the Essence of Imaging

With The Val d'Isère Vilgrain winter course, I aim to create a full immersion in the best of radiology. Over the course of a week, we will cover all radiological specialties with top-tier European speakers. Our goal is to highlight important issues of daily practice.

The combination of lectures and case-based sessions will enhance clinical skills and improve patient management. Furthermore, the magnificent landscape of Val d'Isère creates a special atmosphere that favors interaction and exchange among participants and speakers.

Join us next March!
